

2 PhD Scholarships

for research related to

Adapting Forest Ecosystems to Global Change or Environmental Governance

The Graduate School “Environment, Society and Global Change” at Freiburg University offers 2 scholarships to carry out PhD research within the Research Areas “Adapting Forest Ecosystems to Global Change” or “Environmental Governance”.

The Scholarships are available from 1st January 2009 for a period of 2 years. Successful applicants are expected to enrol into the PhD programme of the Faculty of Forest and Environmental Sciences. PhD students in the Graduate School are expected to complement their research through a number of courses and participation in colloquia, for which they will gain credit points. Content specific courses will be offered through the Graduate School as well as the International Graduate Academy of Freiburg University (<http://www.iga.uni-freiburg.de/>).

The scholarships of € 820 per month cover only the living expenses of PhD scholars. It is therefore important that applicants discuss possible projects with potential supervisors from the Faculty of Forest and Environmental Sciences to ensure that additional costs for travel, experimentation, analyses etc. are covered through other sources. Contact details of possible PhD supervisors can be found on the home pages of participating institutions (<http://www.ffu.uni-freiburg.de/ffu/englisch/WissEinrichtungen.html>).

Applications should contain a CV, academic transcripts, letter of motivation, a project proposal (not more than 10 pages), and letters of conformation by two professors that they will supervise the candidate.

For further information contact Prof. Dr. Jürgen Bauhus:
juergen.bauhus@waldbau.uni-freiburg.de, phone: +49 761 203 3677

Send your application to before 30.11.2008 to:
